

Dear Supervisor Van Scoyoc and Town Board members,

I am writing to pledge my support for the preservation of the residence, guest cottage, and studios where the artists James Brooks and Charlotte Park lived and worked among eleven unspoiled acres in Springs. As a resident of East Hampton Town, I am fully aware of the importance of the Brooks-Park preservation project.

It is vital to our community that this historic site be preserved for future generations. I will be paying close attention to the actions of the town, and fully expect and request that the Town Board finally vote to allocate CPF funding for preservation.

I am further aware that this is one of the most important and endangered cultural sites in the nation. I implore you to finally take the necessary steps to save this irreplaceable site.

Respectfully,
